## Summary

---

Software Engineer with a decade of experience building and maintaining systems for medical device and veterinary e-commerce brands. I've owned the full-stack of what I ship: custom sites, n8n RAG pipelines, integrations and ongoing compliance that keeps them running.

That work started as a marketing and transitioned into engineering. As the company needs transitioned from ad campaigns to full-fledged website development, I took the opportunity to self-teach web development including HTML, CSS & Javascript.

I run a self-hosted homelab (Proxmox, Docker, Tailscale, Portainer, etc) and I am completing a Software Engineering degree with a transfer to a four-year SWE program in progress.

I write things by hand to understand them. I take pride in learning through real hands-on experience.

## Experience

---

### CardiacDirect | CA, San Diego

#### Director of Marketing | 05/2016 - Present

- Built and maintained custom websites and e-commerce systems for medical device brands.
- Designed automation pipelines integrating CRM, inventory, marketing systems and compliance assurance.
- Managed paid acquisition campaigns across search, shopping and display channels.
- Hired, trained and managed dozens of staff members across the marketing department.
- Generated marketing strategies and coordinated campaign execution.

### National Positions | CA, Los Angeles

#### Search Engine Marketing Specialist | 10/2015 - 04/2016

- Optimized shopping campaign data feeds, bids, product management, and return on advertising spend.
- Managed various campaigns including search, shopping, display, retargeting, and social media to drive conversions and maximize ROI.
- Analyzed keyword, ad copy, and website performance to continuously improve campaign effectiveness.
- Conducted keyword and competitive research to inform campaign strategy and increase search visibility.
- Researched, created, evaluated, and tested campaign structures to enhance performance.

### VS Media | CA, Los Angeles

#### Advertising Operations Analyst | 10/2013 - 09/2015

- Utilized Conversion Rate Optimization techniques to improve campaign effectiveness and increase the number of leads or sales generated.
- Managed projects on an in-house advertising platform to ensure successful campaign execution.
- Coordinated media buys across various channels, including search, display, and social media, to maximize exposure and drive conversions.
- Measured campaign performance using analytics tools to identify areas for improvement and make data-driven decisions.
- Prepared monthly reports for internal and external clients, sharing campaign results and progress.
- Reduced cost per customer acquisition through strategic campaign management and optimization.
